

THE COMETS OF DOOM - bandinfo

Five friends have formed a heavy alternative band that is drifting purposefully through the music universe.

THE COMETS OF DOOM are shaking the ground when they hit the stage or the studio, as can be heard their albums „This fine day“ (2014) and „Sound of time“ (2015).

Those who already know their first album will notice the band's development on their new output. And being space vagabonds, they are always moving on – a standstill is not an option.

If you like comparisons with other bands, you might be reminded of FOO FIGHTERS, QUEENS OF THE STONEAGE, PEARL JAM or maybe VOLBEAT,

especially due to a certain similarity in matters of the vocals of those last two bands.

The singer of the band is **Martin Wendt** who is also a member of the rather ludicrous duo SAUFZIEGE & FÜRST B., known their home region for their very special off-key lyrics. Way back at the dawn of time, **Martin** has cut his teeth with his first bands KLAR, RONZ and TRAVELLERS DELIGHT (among others).

In this obscure epoch he met the other COMETS.

Lead guitarist **Holger Marx** used to be a band colleague of Martin's during the KLAR years. Currently he is also a member of the JUTTA WEINHOLD BAND.

Bass player **Jens Stieber**, most often called **Türmchen**, has also gained experience in several bands like PROPHETS OF DESTINY, BACKBONES and OVERSIZE – old acquaintances from the Hanover region.

In these bands **Türmchen** was most often joined by his brother **Jörg Stieber**, whose is a specialist in building guitar soundscapes with unusual effects.

THE COMETS OF DOOM are loud (and won't turn down).

The band's drummer **Sascha Schewe**, a. k. a. **Cain** is responsible for the *loud* part of their sound.

Before joining the COMETS, **Cain** pounded his drums in bands like OVERSIZE, CRAYON and SKIVE and could be seen on many stages in and around Hanover.

THE COMETS OF DOOM combine quite a lot of experience and together they form an explosive missile.

As is fitting for COMETS, they have seen , witnessed and done a lot of things.

When THE COMETS OF DOOM appear on the horizon, the time has come – for catchy alternative metal tracks , songs with burning riffs, heavy beats and exploding melodies!

THE COMETS OF DOOM bring ruin and destruction –for boredom and misery!
